

INTERNSHIP / UDP / TRAINING REPORT – REPORTING 4

(Final Project Completion, Demonstration & Evaluation Report)

1. Student Information

Student Name	Krish
Enrollment Number	22SSO2CA005
Program/Branch	Computer Engineering
Semester	Semester 6
Contact Number	+91 9876543210
Email ID	krish@example.com

2. Internship / UDP / Training Details

Type	User Defined Project (UDP)
Company/Organization	P P Savani University
Department/Domain	Full Stack Web Development / E-Commerce
Mentor Name (Company)	Industry Guide
Mentor Name (Institute)	Institute Mentor
Start Date	01-06-2026
End Date	25-07-2026

3. Work Progress Summary

a) **Project Title: Full-Stack E-Commerce Web Application (Aura)**

b) Brief Overview of Work Completed After Reporting 2

Mention only the work completed **after Reporting 2**.

- Major tasks completed:
- Modules completed:
- New features implemented:
- Research / development work completed:
- Integration work completed:

c) Overall Project Completion Status

Component	Status	Completion (%)
User Auth & JWT	Implemented registration, login, and secure token generation using bcrypt and jsonwebtoken.	Completed
Design	Completed / In Progress	
Development	Completed / In Progress	
Integration	Completed / In Progress	
Testing	Completed / In Progress	
Documentation	Completed / In Progress	
Deployment	Completed / In Progress / N.A.	
MongoDB Models	Created Mongoose schemas for users, products, addresses, and orders.	Completed
Razorpay Integration	Setup server-side payment generation and client-side checkout.	Completed

Frontend UI	Connected HTML/JS views with backend APIs via fetch to display live products and cart.	Completed
Cart & Checkout	Managed cart state globally and successfully passed order requests to backend.	Completed

Overall Project Completion: _____ %

4. Advanced Implementation

Describe the major implementation work completed after Reporting 3.

a) Module / Feature Implementation

Module / Feature	Work Completed	Status
Securing API endpoints and handling authentication states.	Used Express middleware to verify JWT tokens and inject authenticated user ID into request headers.	Completed / In Progress
		Completed / In Progress
		Completed / In Progress
Ensuring reliable payment transactions with Razorpay API.	Verified Razorpay signatures securely in the backend using crypto module to prevent tampering.	

b) Integration / Development Details

Explain:

- Module integration
- API integration: Integrated Razorpay API for live checkout payment processes.
- Database integration

- Hardware integration, if applicable
- Software integration
- Major coding / development work

c) Final / Updated Architecture

Attach the **updated system architecture, workflow, block diagram, UML diagram or process flow.**

Diagram:

[Insert Updated Architecture / Workflow]

5. Final Testing and Validation

Describe the testing performed on the implemented work.

Testing Performed

Testing Area	Tests Conducted	Passed	Failed	Final Status
Functional Testing				
Integration Testing				
System Testing				
Performance Testing				
User Acceptance Testing				

6. Results and Performance Analysis

Critical Bugs / Issues

Issue	Severity	Resolution	Final Status

Final Validation Statement

Is the project ready for final demonstration/submission?

☐ Yes

☐ Yes, with minor improvements

☐ No

PPSU

NAAC
ACCREDITED

b) Output / Result Screenshots

Screenshot 1: Frontend E-commerce UI

Description: Showcases the responsive homepage and product grids.

Screenshot 2: Backend API and Database

Description: Demonstrates MongoDB connected via Express.js handling product fetch and payment flow.

Screenshot 3:

[Insert Screenshot]

Description:

Students should include genuine screenshots/results from their actual work.

7. Final Results and Outcomes

- ☐ Completed
- ☐ Mostly Completed
- ☐ Partially Completed
- ☐ Work in Progress

Completed Components

PPSU

P P SAVANI UNIVERSITY

NAAC
ACCREDITED

Pending Components

8. References and Resources Used

Minimum 5 genuine references(APA 7th Edition) are mandatory.

Students must mention the resources actually used during the work.

References may include:

- Research papers

- Books
- Official documentation
- Technical websites
- Standards
- APIs / libraries
- Software documentation

References

[1] Author Name, "Paper Title," Journal / Conference Name, Year.

[2] Author Name, "Paper Title," Journal / Conference Name, Year.

[3] Website / Organization Name, Page Title, URL, Access Date.

[4] Author Name, *Book Title*, Publisher, Year.

[5] Website / Documentation Name, Page Title, URL, Access Date.

Reference Requirements

- Minimum **5 references**
- References must be relevant to the project.
- Sources must actually be used by the student.
- References must be cited wherever required in the report.
- Fake or unrelated references are not acceptable.
- Official documentation and reliable academic sources are preferred.

Evaluation (To be filled by Mentor (Institute))

Criteria	Excellent	Good	Average	Poor	Marks
Final Project Completion & Implementation	≥90% meaningful work completed	75–89%	50–74%	<50%	/25
Functionality, Testing & Validation	Strong testing with evidence and analysis	Good testing	Limited testing	No meaningful validation	/25
Technical Understanding	Strong conceptual and technical understanding	Good understanding	Basic understanding	Unable to explain work	/20
Project Demonstration and Results	Complete, clear and well documented	Minor gaps	Incomplete documentation	Poor documentation	/20
References & Citations	Relevant, properly cited and formatted	Minor issues	Limited/relevant sources	Missing/improper	/10
TOTAL					/100
